

BlueLine Rental formerly Volvo Rents, has proudly partnered with Homes for Our Troops to do their part to help build specially adapted homes for severely injured Veterans and their families. The BlueLine Rental philanthropic initiative plays a key role in donating construction equipment and raising funds to help provide deserving military families with some of the independence that they lost while serving our great nation.

BlueLine Rental operates more than 130 company-owned rental stores in North America. Each of the North American rental centers offers a comprehensive line of essential equipment for the construction, commercial and industrial markets, as well as an extensive line of compact excavators, compactors, wheel loaders, backhoe loaders, compaction equipment, and skid steer loaders.
